**Adobe Acrobat Sign**

Adobe Acrobat Sign Embed Program and Acrobat Sign APIs

Embed secure and trusted e-signatures inside your platform.

Digital transformation is no longer a nice-to-have—it's a must-have. To compete successfully, businesses must replace inefficient, paper-based processes with 100% digital workflows. You can make one of the biggest impacts by digitizing documents that require approval, authorization, or consent. The Adobe Acrobat Sign Embed Program and Acrobat Sign APIs make it easy for organizations to integrate automated workflows and e-signature capabilities.

Eliminate manual and paper-based approval processes by embedding secure, trusted, and legally binding e-signature capabilities, powered by Adobe Acrobat Sign, inside your platform, mobile app, or website.

The Acrobat Sign Embed Program, along with robust Acrobat Sign APIs, make it easy for your team to develop an integration that resides natively inside your solution so you can go to market quickly.

Elevate customer experiences with all-digital e-signatures.

Acrobat Sign removes friction by providing your users with 100% paperless signing experiences and automated workflows that can be accessed from any device. Not only will you increase their efficiency and boost their productivity, but you'll also help create a smoother, more enjoyable experience for everyone.

Increase your customers' engagement time with your platform.

By embedding Acrobat Sign in your platform, there's no need for your users to leave your application to get documents sent, signed, and returned. You can add the ability to send a document for e-signature right from within your solution; allow recipients to sign the document on any desktop or device with a click, tap, or swipe (no downloads or accounts required); track the document status; and securely store approved documents.

Gain these valuable benefits by embedding Acrobat Sign inside your platform:

- Elevate customer experiences.
- Increase platform engagement time.
- Control the end-to-end workflow.
- Focus your team on their core expertise.
- Grow revenue, add value, and differentiate.
- Work with Adobe, the digital document leader.

Imagine providing your customers the ability to do all this and more—right from within your solution:

- Create documents with data and e-signature fields.
- Send documents for e-signature.
- Specify the order in which parties sign the documents.
- Sign documents on any device, from anywhere.
- Track document status with real-time notifications.
- Go beyond signing and approvals to streamline tasks like form filling.
- Download date- and time-stamped audit trails.
- Store signed documents with a tamper-evident seal.

Embed Acrobat Sign e-signatures and automated workflows in platforms, mobile apps, and websites across a broad spectrum of industries and use cases.

Sales—Speed sales cycles—get quotes, agreements, and contracts signed with a fully customized signing experience.

Human resources—Onboard employees and get staff certified faster, with legally valid and globally secure e-signatures.

Real estate/property management—Send renters all-digital lease agreements that can get turned around in minutes.

Procurement—Speed request for proposals (RFPs), bids, and contract cycle times with e-signatures, so your teams can deliver critical documents on time.

Financial services—Onboard clients faster with online applications and approvals from any device or location with legally valid and secure e-signatures.

Government—Improve citizen services and boost efficiencies with e-signature processes and cost-effective digital experiences.

Higher education—Streamline student, staff, and faculty services with online enrollment and servicing.

Healthcare and life sciences—Provide paperless consent, waiver, and permission forms, making life easier for patients or clinical trial participants.

Control the end-to-end workflow.

The Acrobat Sign APIs give you flexibility to tightly embed the signing experience inside your platform for maximum control and customization. With Acrobat Sign capabilities embedded in your offering, you can deliver a native experience designed with your customers' specific needs in mind.

Let your teams focus on their core expertise.

Free up your development team to focus on their core expertise and leave the e-signature components, security, and compliance to us. When you embed Acrobat Sign inside your platform, application, or website, you get a secure and globally compliant SaaS platform. Acrobat Sign is certified compliant with rigorous security standards, including SOC 2 Type 2, ISO 27001, FedRAMP Tailored, and PCI DSS used in the Payment Card Industry. Acrobat Sign can also be configured to support compliance with industry-specific regulatory requirements, such as HIPAA, FERPA, GLBA, and FDA 21 CFR Part 11.

Grow revenue, add value, and differentiate.

Create new automated e-signature workflows that drive incremental revenue while adding value to your offering. As part of the Acrobat Sign Embed Program, you also have full control on how you price or offer Acrobat Sign to differentiate your solution from your competitors.

Work with the digital document leader.

Adobe is the global leader in secure digital documents and a trusted technology partner for future innovation. Acrobat Sign powers all-digital employee and customer experiences for numerous platforms, mobile apps, and websites—and most of the Fortune 100. Plus, we will help ensure that your solution is in compliance with e-signature laws in the United States, Europe, Japan, Australia, and virtually every other industrialized nation in the world.

About the Acrobat Sign Embed Program

The Adobe Acrobat Sign Embed Program helps you deliver streamlined user experiences where you own the end-to-end customer journey inside your platform. As part of the Adobe Acrobat Sign Embed Program, Adobe experts are committed to your success and provide the guidance, expertise, and resources your team needs for initial deployment, long-term success, and maximizing your investment.

If you are interested in embedding Acrobat Sign inside your platform, application, or website for use by your customers, please contact us at signembed@adobe.com.
